

## SweetStreet Manhole Odor Control Module

### DESCRIPTION:

Continental Carbon Group's SweetStreet manhole odor control module is an odor control product meant exclusively for use in sewer manholes. The unique design of the SweetStreet allows it to fit within the manhole itself. Once the manhole cover is replaced, the SweetStreet is completely out of sight. The SweetStreet is a two-part assembly: i) the manhole insert uses a stepped design that can be cut to fit the exact size of the manhole; ii) the carbon module holds 0.3 ft<sup>3</sup> of granular activated carbon for odor control.

### FEATURES:

- Passive system
- All-plastic construction
- Unique "Stepped" Housing

### BENEFITS:

- System has no moving parts and requires no water or electricity for operation
- Robust, corrosion-resistant construction ensures years of service life
- Stepped housing allows unit to be cut to size to fit virtually any manhole
- High-capacity activated carbon ensures stable operation – able to treat uneven loadings and spikes without odor breakthrough
